AWS Student Builder Group · Google Cloud · IBM SkillsBuild · µLearn · IEEE · RIET

PROFILE

B.Tech Computer Science and Engineering student with a balanced record across software development, AI and cloud projects, data science, technical communication, community leadership, and event execution. Builds usable prototypes, explains technical ideas clearly, and works effectively across engineering and people-facing responsibilities.

CAREER HIGHLIGHTS

- Hosted spoken and technical community events, including the AWS SBG RIET student exposure talk show and faculty-supported Vidya Sadhnam workshops.
- Built a portfolio spanning AI automation, RAG, cloud infrastructure, data science, Android, banking, agriculture, and report generation.
- Led community and partner-facing work involving student onboarding, speakers, HR communication, candidate sourcing, logistics, and institutional coordination.

EXPERIENCE

Project Engineering Intern / AI Automation — KSERC | Mar 2026–Present

- Contributed to regulatory automation involving documents, tables, calculations, retrieval, validation, and cloud-ready services.

Founder — Vidya Sadhnam | Sep 2025–Present

- Built a student community and hosted technical workshops connecting students with Linux, GitHub, cloud, AI, data, and professional development.

Alumni Cell Lead / Community Operations — µLearn Foundation | Jan 2026–Present

- Coordinated onboarding, partner engagement, candidate sourcing, speakers, logistics, and institutional collaboration across student programs.

Earlier Internships — VirtuNexa, Innovate Intern, Edunet Foundation, EISystems, A.N.D. Intern | Jun 2024–Jan 2025

- Worked across Android, front-end, cloud, AI, and data science learning programs.

SELECTED PROJECT PORTFOLIO

LinkedIn Indo — AI-assisted, local-first LinkedIn drafting tool with persona training, revision, validation, and AWS-capable deployment.

KSERC Autonomous Regulatory Agent — Evidence-oriented regulatory analysis with PDF processing, retrieval, financial logic, and auditability.

MediScribe / MedBuddy — Grounded medical AI and RAG workflows with citations, evaluation, and user-facing interfaces.

Fasal Saarthi / Smart Irrigation — Applied ML for agriculture, recommendation, dashboard analytics, and sustainability-oriented decisions.

KNB Bank / Report Indo / AtithiFusion — Java/JDBC banking workflows, structured Word report generation, and responsive accommodation discovery with chatbot interaction.

TECHNICAL TOOLKIT

Python, Java, JavaScript, SQL, HTML, CSS, FastAPI, Streamlit, Android, JDBC, Oracle, REST APIs, Git, Linux, AWS, Google Cloud, IBM Cloud, Terraform, Docker, machine learning, RAG, data analysis, event management, public speaking, leadership

COMMUNITY, EVENTS AND LEADERSHIP

- AWS Student Builder Group community leadership and cloud learning initiatives at RIET.
- Founder, Vidya Sadhnam; hosted GitHub Geeks and Data Manipulators workshops and coordinated audience, venue, speakers, and technical sessions.
- µLearn Alumni Cell and Partner Engagement responsibilities across community growth, HR outreach, candidate profiling, and event operations.
- CSI and IEEE participation; school leadership; debate, cultural, music, and public-speaking activities.

EDUCATION AND TRAINING

B.Tech, Computer Science and Engineering — Rajadhani Institute of Engineering and Technology | Expected 2027

AWS and cloud training; IBM SkillsBuild AI and data science; Google Cloud-focused internship; cybersecurity, Android, web development, 3D printing, and IEEE/AICTE programs.

TARGET CONTRIBUTION

Ready to contribute to software engineering, AI/ML, cloud infrastructure, developer productivity, technical program management, community, or people-facing operations teams.

Interview CV: visual wordmarks are contextual identifiers only; no employer endorsement is implied.
