PRAKHAR SHARMA

BUILDING USEFUL SYSTEMS AT THE INTERSECTION OF AI, CLOUD, AND COMMUNITY

Trivandrum, Kerala | +91 7994454919 | praksediting5@gmail.com

PROFILE

Computer Science and Engineering student who turns ambiguous ideas into working, explainable prototypes. My strongest work sits where applied AI, cloud infrastructure, document intelligence, and user experience meet. I am comfortable moving from a problem statement to a Python service, a working interface, a deployment plan, and a clear explanation for non-specialists.

WHAT I BUILD

AI and knowledge systems — RAG pipelines, grounded answers, document ingestion, table extraction, retrieval, validation, and human review.

Cloud-native tools — AWS serverless patterns, Terraform, Lambda, API Gateway, Cognito, DynamoDB, object storage, Bedrock, and local fallbacks.

Applied software — FastAPI services, Streamlit dashboards, Java/JDBC systems, Android prototypes, and responsive web interfaces.

PROOF OF WORK

LinkedIn Indo — A local-first writing assistant that learns from a user's own persona and drafts posts without publishing automatically. Designed for safe revisions, provider switching, offline operation, and AWS deployment.

KSERC Autonomous Regulatory Agent — A document and regulation analysis platform for truing-up petitions, with PDF/table extraction, retrieval, mathematical checks, audit trails, and cloud-ready services.

MediScribe / MedBuddy — An evidence-based clinical AI platform that prioritises source citations, refusal outside context, evaluation, and modular retrieval architecture.

Fasal Saarthi and Agri-Smart Pro — Applied ML systems for crop recommendation and intelligent irrigation, connecting models to usable dashboards and APIs.

KNB Bank Management System — Role-based Java Swing, Oracle, and JDBC application with client, manager, and admin workflows.

EXPERIENCE

VirtuNexa — Project Intern | Dec 2024–Jan 2025

Android development with Java and Kotlin; UI implementation, debugging, and performance-oriented collaboration.

Innovate Intern — Cloud Computing Intern | Sep 2024–Nov 2024

Google Cloud-oriented cloud learning and AI/ML workload security concepts.

Edunet Foundation / IBM SkillsBuild — AI and Front-End Intern |

Jun 2024–Dec 2024

AI foundations, front-end development, data workflows, cloud applications, and responsible technology.

A.N.D. Intern — Data Science Intern | Jun 2024–Jul 2024

Data manipulation, analysis, visualisation, and practical problem-solving.

LEADERSHIP

MuLearn Alumni Cell Lead; Founder, Vidya Sadhnam; CSI and IEEE community participant; two-time School House Captain; event coordinator and public speaker.

EDUCATION

B.Tech, Computer Science and Engineering

Rajadhani Institute of Engineering and Technology | Expected 2027

TOOLKIT

Python, Java, JavaScript, SQL, FastAPI, Streamlit, TensorFlow, PyTorch, Jupyter, Git, GitHub, AWS, Google Cloud, IBM Cloud, Terraform, Docker, JDBC, Oracle, Linux, REST APIs.

INTERVIEW POSITIONING

I am looking for an internship where I can contribute as an engineer from day one, learn from strong reviewers, and own a measurable slice of a product: cloud automation, AI evaluation, backend services, developer tools, or data-driven applications.
