AWS Student Builder Group · Google Cloud · IBM SkillsBuild · µLearn · IEEE · RIET

PROFILE

Computer Science and Engineering student building practical AI, backend, cloud, and developer tools. Hands-on work spans RAG, document intelligence, machine learning, REST services, Terraform, AWS serverless patterns, Google Cloud, and user-facing applications. Seeking software engineering, AI/ML, cloud, or platform internships.

CAREER HIGHLIGHTS

- Hosted spoken and technical community events, including the AWS SBG RIET student exposure talk show and faculty-supported Vidya Sadhnam workshops.
- Built a portfolio spanning AI automation, RAG, cloud infrastructure, data science, Android, banking, agriculture, and report generation.
- Led community and partner-facing work involving student onboarding, speakers, HR communication, candidate sourcing, logistics, and institutional coordination.

EXPERIENCE

Project Engineering Intern / AI Automation — KSERC | Mar 2026–Present

- Contributed to a regulatory analysis system for PDF ingestion, table extraction, retrieval, calculations, compliance checks, and audit-oriented outputs.
- Extended local and cloud execution patterns using document storage, object storage, Bedrock-ready LLM integration, and Terraform.

Project Intern — VirtuNexa | Dec 2024–Jan 2025

- Developed and tested Android features with Java and Kotlin; improved UI implementation, debugging, modularity, and performance.

Cloud / AI / Data Internships — Innovate Intern, Edunet Foundation, EISystems Technologies, A.N.D. Intern | Jun 2024–Nov 2024

- Applied cloud architecture, AI tools, data manipulation, visualization, model deployment, REST APIs, and security concepts across guided projects.

AWS Student Builder Group · Google Cloud · IBM SkillsBuild · µLearn · IEEE · RIET

SELECTED PROJECT PORTFOLIO

LinkedIn Indo — Local-first AI drafting assistant with persona learning, style samples, revisions, validation, human approval, offline fallback, and AWS Terraform infrastructure.

KSERC Autonomous Regulatory Agent — PDF/table extraction, regulation retrieval, financial calculations, human-in-the-loop validation, document export, and local/AWS execution.

MediScribe / MedBuddy — Evidence-based medical AI workflows with ingestion, chunking, retrieval, re-ranking, citations, evaluation, and clinical interfaces.

Fasal Saarthi / Agri-Smart Pro — Applied ML systems for crop recommendation and intelligent irrigation with dashboards, analytics, APIs, and cloud-oriented deployment.

KNB Bank Management System — Role-based Java Swing, Oracle, and JDBC banking application with client, manager, admin, transaction, approval, and audit workflows.

TECHNICAL TOOLKIT

Python, Java, JavaScript, SQL, FastAPI, Streamlit, REST APIs, RAG, NLP, TensorFlow, PyTorch, Jupyter, AWS, Lambda, API Gateway, Cognito, DynamoDB, S3, Bedrock, Google Cloud, Cloud Run, Vertex AI, IBM Cloud, Terraform, Docker, Git, Linux, JDBC, Oracle

COMMUNITY, EVENTS AND LEADERSHIP

- AWS Student Builder Group community leadership and cloud learning initiatives at RIET.
- Founder, Vidya Sadhnam; hosted GitHub Geeks and Data Manipulators workshops and coordinated audience, venue, speakers, and technical sessions.
- µLearn Alumni Cell and Partner Engagement responsibilities across community growth, HR outreach, candidate profiling, and event operations.
- CSI and IEEE participation; school leadership; debate, cultural, music, and public-speaking activities.

EDUCATION AND TRAINING

B.Tech, Computer Science and Engineering — Rajadhani Institute of Engineering and Technology | Expected 2027

AWS and cloud training; IBM SkillsBuild AI and data science; Google Cloud-focused internship; cybersecurity, Android, web development, 3D printing, and IEEE/AICTE programs.

TARGET CONTRIBUTION

Ready to contribute to software engineering, AI/ML, cloud infrastructure, developer productivity, technical program management, community, or people-facing operations teams.

Interview CV: visual wordmarks are contextual identifiers only; no employer endorsement is implied.
